

Team tournament with GeoSilhueta

Teacher activity sheet • Geography • 15 to 20 minutes

Setup (3 min). Project a computer or phone screen, open geosilhueta.com.br/?lang=en&sala=1 (or pick *Classroom (teacher)* in the menu) and split the class into 2 to 4 teams.

How to run it

- Set the teams, rounds (each team plays once per round) and, optionally, a continent.
- The silhouette appears. The team whose turn it is discusses for 20 to 30 seconds and answers out loud.
- If they get stuck, ask for hints (up to 3 per country, drawn at random): **letters**, **continent**, **flag**, **neighboring country** and **fun fact**. Each hint used takes away 1 point.
- Mark **Correct** or **Wrong**. The country is revealed with its flag, continent, language and currency: use it to comment.
- **Point steal** (optional): if a team misses, the others try; whoever gets it right takes half the points (rounded up).
- At the end, the scoreboard shows the winning team and the list of countries played.

Scoring

No hints	1 hint	2 hints	3 hints	Wrong
4 points	3 points	2 points	1 point	0

Keyboard shortcuts

D hint • **A** correct • **E** wrong • **Space** next • **F** full screen • on a steal: team number or **0** (nobody)

Variations

- **Review by continent:** pick a single continent before a test.
- **60-second challenge:** with phones or computers, each student plays *Against the clock* and writes down their score; then compare strategies.
- **Explain like a geographer:** for each correct answer, the team names one feature of the country (neighbors, language, relief, climate) before scoring.

Tip: adapt the rules and answer time to your class goals.

Class record sheet

Team name and points per round. Fill in during the activity.

Round	Team 1: _____	Team 2: _____	Team 3: _____	Team 4: _____
1				
2				
3				
4				
5				
6				
7				
8				
9				
10				
Total				

Countries we missed (to review)

To talk about afterwards

- Which country was hardest to recognize? What helped you identify it?
- Which clue (shape, size, neighbors, position on the continent) helped most?
- Which countries look alike? How can you tell them apart?
